## JAPAN.

*Report from Yokohama—Inspection of vessels—Cholera situation at Moji, Shimonoseki, and other localities—Quarantine station opened at Suminoe port, near Nagasaki.*

Passed Assistant Surgeon Cumming reports, August 26:

Week ended August 24, 1907. Bills of health were issued to 7 vessels having an aggregate personnel of 3,688 crew and 594 passengers. All steerage passengers, 574 in number, were bathed and their effects disinfected. The steamship *Satsuma*, bound hence via oriental ports and the Suez Canal, was granted a clean bill after fumigation by the local authorities.

No further cholera has occurred here, but the situation in Moji is alarming, many cases occurring daily. Some cases have been found at Shimonoseki, across the strait, but a quarantine between the two was started yesterday.

Cholera has been found in other towns in Fukuoka Ken, which is the prefect in which Moji lies and is north of Nagasaki.

A quarantine station has been opened at Suminoe port, in Saga Ken, near Nagasaki, and quarantine officers appointed for the prefectures (kens) of Tottori, Shimane, Saga, Kumamoto Miyazaki, and Kagoshima.

*Emigrants recommended for rejection.*

Number of emigrants per steamship *Tosa Maru* recommended, August 21, 1907, for rejection: For Seattle, 17. These rejections were all for trachoma.

*Report from Nagasaki—Fatal cholera cases imported from Shanghai—Quarantine of vessels from Shanghai.*

Sanitary Inspector Bowie reports, August 20:

August 16 I was summoned to a local hotel to see a man who had arrived August 12 from Shanghai. I found him suffering from Asiatic cholera. He had already passed into a state of collapse and in three hours was dead. He had come on the steamship with a friend who went to a summer resort and who also died of cholera
